ABOUT ME

I am a qualified Computer Engineer specializing in the development, implementation, and leadership of technological solutions.

I have experience managing critical projects, such as document management systems and industrial traceability platforms, contributing to both software architecture and technical consulting.

My goal is to apply my analytical vision and solid technical foundation to optimize operational processes and lead technological innovation within an organization.

WORK EXPERIENCE

Software Engineer

De La Cruz Lavandería, 2024 - present

- Technical consulting and development area management in strategic projects, ensuring the operational maintenance of critical systems.
